Art Unit: 1793

DETAILED ACTION

The examiner acknowledges applicant's amendment filed 12/23/2009 cancelling claims 1-9. Claims 11-19 are currently pending. The previously issued objections to claims 12 and 15 have been withdrawn in view of applicant's amendments to these claims.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mike Kaminski on 01/29/2010.

The application has been amended as follows:

Claim 19 is cancelled.

Allowable Subject Matter

Claims 11-18 are allowed.

The following is an examiner's statement of reasons for allowance: the limitation in claim 11 requiring an emulsion for producing the noble metal particle and a separate emulsion for producing the transition metal particle which solutions are combined post-reduction is only found to be taught in a prior issued patent commonly owned by the assignee of the current application. The filing date of the prior issued patent is less than one year earlier than the

effective filing date of the current application. No double patenting situation exists because the current claim 11 requires firing in air whereas the prior issued patent catalyst composition must be calcined in an inert atmosphere to prevent oxidation of the carbon support.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
